Hi:

Second attempt to send you photos. I received an error because it was too big with all the photos.

Dan, attached are the photos presented to you during your visit.

Have a good weekend.

Eric, can you email me the photos you had on the desk that you showed us? Some of those I'd like to use for the print version, as they really do help visualize and describe what you are working on over there.

Thanks again for taking the time.

I wish I had gotten that email from Mike ahead of time, as it threw me off today. I wasn't prepared to ask only specific questions--I was under impression you could answer most of the questions.

In the future--both Mike and Elias--it is best someone call to confirm I get an email that on its face seemed important.

Sincerely,

Dan Telvock

Dan:

Wanted to drop you a note prior to your scheduled interview with Eric Daly - EPA Region 2 On-Scene Coordinator set for Friday June 10, 2016 at 10:30 am. in Niagara Falls, NY. You can meet Eric at EPA's office trailer located on the east- side of the parking lot of the building supply store. Eric can provide 60 minutes of his time to you in total. This includes on-camera, shooting B-roll, and off-camera time.

Eric is prepared and authorized to address his role as On-Scene Coordinator, the scope of his work and the nature of his work at this Site. He is prepared to elaborate on information provided in the Community Update. He is also prepared to address the nature of the contamination and steps the EPA is considering to mitigate the risks. Eric can demonstrate field equipment, if you wish, as part of this time.

No contractor nor sub-contractor has been authorized to be interviewed. We can provide you their respective media relations departments, if you wish to request an interview.

Topics that Eric cannot address because they are beyond the scope of his assignment at this Site may include EPA national policies, trends across New York State, the region or across the country, potential health impacts to any one individual or group of individuals and questions of liability. Questions about any of these topics should be sent to EPA's Public Information Officer: Elias Rodriguez, (212) 637-3660, rodriguez.elias@epa.gov who will be in the office on the day of this interview. Any community relations outreach questions can be directed to me at (716) 551-4410 or basile.michael@epa.gov. I will not be at the interview because I will be attending my uncle's funeral services, but can be contacted on Monday June 13th. In the case of any health concern questions, they should be directed to the appropriate State health agency. We have many other subject-matter experts that may be able to address topics beyond the scope of Eric's cleanup work.

Once on-camera, we assume that you will provide Eric the courtesy to re-state answers or re-take segments that he may request to repeat to clarify his responses or correct where he may have misspoken.

Mike Basile, USEPA Region 2
